PROFESSIONAL SUMMARY

Full Stack Developer experienced in developing and maintaining web applications, building RESTful APIs, and connecting frontend interfaces with backend services. Hands-on experience with React.js, Next.js, Node.js, Express.js, and FastAPI, alongside MongoDB, MySQL, and PostgreSQL. Focused on clean code, responsive user experiences, secure data handling, and reliable enterprise workflows.

TECHNICAL SKILLS

Frontend: HTML5, CSS3, Tailwind CSS, React.js, Next.js

Backend: Node.js, Express.js, FastAPI, RESTful APIs, Frontend–Backend Integration

Databases: MongoDB, MySQL, PostgreSQL, Database Operations

Tools: Git, GitHub, Postman

PROFESSIONAL EXPERIENCE

Full Stack Developer | AgenticSense Nov 2025 – Present

- Develop and maintain full-stack web applications, contributing to frontend features and backend functionality.
- Build and integrate secure RESTful APIs to support communication between client interfaces and server-side services.
- Manage database operations and application data flow to support reliable functionality across the platform.
- Collaborate on improving application performance, maintainability, and the overall user experience.

Full Stack Developer | Coderatory Jun 2025 – Oct 2025

- Contributed to full-stack web applications throughout the software development lifecycle, from implementation to troubleshooting.
- Built responsive and interactive user interfaces with attention to usability, layout consistency, and performance.
- Worked with backend integrations and application data flows to support complete product functionality.
- Collaborated with team members to identify issues, improve code quality, and deliver project milestones on schedule.

PROJECTS

AI-Powered Agentic OCR & Financial Document Processing Platform

- Developed an enterprise document-processing platform for a Saudi steel manufacturing company to support PDF uploads, document management, and financial data extraction workflows.
- Built backend services and APIs for document data handling, validation flows, database operations, and frontend–backend communication.

Technologies: Next.js, FastAPI, Python, PostgreSQL | **Focus:** Document processing, data validation, ERP integration, financial workflow automation

Enterprise ERP System & Corporate Website

- Developed an ERP system and corporate website for a mining and construction company, supporting business operations through multiple modules, dashboards, and structured data management.
- Implemented API-driven functionality and user-management features while helping deliver a professional online presence for the company.

Technologies: Next.js, Node.js, Express.js, MongoDB | **Focus:** Business dashboards, user management, data management, API integration
